DOC Exempt Letter On File

ALPHABETICAL INDEX OF COMMODITIES ON INTERNATIONAL LISTS

16 JUNE 1959

FOREWORD

The commodities included in this Index represent all the items on the International Lists (Embargo, IL I; Watch, IL IV; Munitions, ML; and Atomic Energy, AE) set forth in COCOM Document 3300, 19 December 1958, with revisions to date. These commodities are embargoed to the Sino-Soviet Bloc, except those on the Watch List, exports of which must be reported to COCOM.

The complete description is given for most items; the basic list is referenced for others. The key part of each description is underlined. The items on IL I and IL IV are identified by four digits beginning, respectively with 1 and 4, as 1133, 1760, and 4653; those on ML and AE, by one or two digits with the appropriate prefix, as ML-2, ML-14, AE-5, and AE-13.

Commodities covered only by US unilateral export controls are not included in this Index.

Revisions of this Index will be issued as necessary.

16 June 1959

-1-

Description of Commodity	List and	Item No.
Absorbing materials - designed to absorb electromagnetic waves having frequencies greater than 2 x 100 cycles per second and less than 3 x 1012 cycles per second		1561
Acoustic aiming devices (fire control) specially designed for military purposes		ML-5
Aero-engines, military		ML-10
Aero-engines, n.e.s See Aircraft item IL 1460 for excepti	ons	1460
Aerofoil milling, grinding, and shaping machines, and automatic measuring equipment for the manufacture and measurement of gas turbine blades		1080
Aiming devices, specially designed for military purposes and specialized parts, accessories, and attachments		M L- 5
Airborne communication equipment, n.e.s., and specialized parts and components thereof - See list for specificati and exceptions	o n s	1501
Airborne direction finding equipment - See list for specifications and exceptions		1501
Airborne equipment designed for use with military aircraft, including refueling equipment, and components and parts thereof		M L- 10
Airborne navigation equipment, n.e.s., and ground and marine equipment for use therewith, and specialized parts and components thereof - See list for specifications and exceptions	•	1501
Airborne radar equipment		1501
Aircraft, aero-engines, and aircraft equipment, except types in civil use for more than 2 years and other civil types under 90,000 lbs. empty weight - See ML-10 for military coverage		1460
Aircraft, civil, n.e.s.		4460
Aircraft fuel, blending agents for - See "blending agents" for complete description		1789

Approved For Relea<u>e</u>e<u>ያርባር ተወያረታል ፱</u>ር<u>ተልተ</u>ደ<u></u> ይደር<u>ተልተ</u>

Aircraft, military, piloted or pilotless, and components and parts - See list for specifications	ML-10
Aircraft personnel escape devices - catapult and cartridge actuated types	ML-10
Aircraft sheet, plate, or extrusion, machinery for the working or forming of	1081
Aircraft skin, milling machines for the manufacture of	1081
Airfield equipment, except types in normal civil use	1460
Airplane engines, piloted or pilotless, (for military use) and components and parts	ML-10
Airplane spar milling machines	1051
Aliphatic acid esters, dibasic saturated, combined with saturated aliphatic monohydric alcohols and polyglycols - See list for specifications	1781
Alkylates (aviation grade) - high octane blending agents for aviation fuel	1789
Alkylation processing units	4151
Alkyl polysulphide liquid (not water dispersions) polymers of (synthetic rubber)	1801
Alloys, cobalt, containing 6% or more of cobalt, except permanent magnets containing 25% or less cobalt content	1635
Alloys, cobalt, containing 50% or more cobalt; or 19% or more cobalt combined with 14% chromium and less than 1% carbon or more than 3% molybdenum	1648
Alloys, cobalt, n.e.s., containing 19% or more cobalt and 14% or more chromium	4648
Alloys, magnesium base, all crude forms or semi-fabricated forms containing 0.4% or more zirconium or 1.5% or more thorium or 1% or more rare earth metals (cerium mischmetal), and scrap forms covered by this item	1654
Alloys, molybdenum base, containing 60% or more molybdenum	1658
Alloys, nickel base, containing 32% or more nickel - See list for exceptions	1661

Approved For Release 2001/08/<u>ខ</u>ុ<u>8</u>6<u>-ឆ្កាំងក្នុកព្រះ្ធា លុខទុស្សាល</u>្អ100020001-4

- 3 -

Alloys, nickel based, n.e.s.	4661
Alloys, niobium (columbium) based, containing 60% or more niobium or 60% or more niobium-tantalum	1649
Alloys, steel, containing 50% or more iron and containing molybdenum (10% or more); molybdenum - chrome alloy, (5% or more molybdenum with 14% or more chrome); cobalt (6% or more) except permanent magnetic materials containing less than 25% cobalt; columbium or tantalum (1.5% or more); nickel bearing steels (32% or more alloying elements); and precipitation hardening alloy steels containing 4% or more nickel	1635
Alloys, tantalum based, containing 60% or more tantalum or 60% or more tantalum - niobium	1670
Alloys, titanium based, containing 70% or more titanium	1671
Altimeters, pulse modulated	1501
Altitude simulating climatic conditioning chambers - See list for specifications	ML-19
Ammonium picrate and ammonium perchlorate (military high explosives)	ML-8
Ammunition and all specially designed components and parts thereof for the weapons outlined under artillery and small arms entries (ML-1 and ML-2)	ML-3
Ammunition (Munition List items only), machinery, equipment, checking and test gear for the manufacture of	ML-18
Amphibious and deep water fording military vehicles, and specifically designed components and parts	мь-6
Amplifiers n.e.s., designed to operate at frequencies above 300 Mc/s and tuned, untuned and DC amplifiers - See list for specifications	1521
Amplifiers (electronic or magnetic) isolation or summing types designed for use with resolvers in control equipment	1568
Amplifier equipment (terminal or intermediate) designed to deliver, carry or receive frequencies higher than 16 kc/s into or in line communication transmission equipment	1523

Approved For Release 2001/08/28 : CIA-RDP78-02646R000100020001-4

- 4 -

Amplifier klystrons and specialized parts	1558
Analyzers, radio spectrum, designed to operate at frequencies in excess of 300 megacyles per second and specialized parts therefor	1533
Anti-aircraft protection equipment, i.e., flak suits and parts	ML-13
Anti-friction bearings (ball, roller) and parts - See list for specifications	1601
Anti-"G" suits, associated components and equipment specially designed for military use	M L- 10
Armor plate, drilling (other than radial), planing machines and quenching presses	ML-1 8
Armored equipment, including: armor plates, military nelmets, body armor, and flak suits, and specifically designed components and parts	ML-13
Armored or armed vehicles designed for military purposes, including armored railway trains and components and parts	ML-6
Arms (Munitions list items only) - machines, equipment and test gear for the manufacture, checking and examination of arms	M L-1 8
Arms (small) and specially designed components and parts	ML-1
Aromatization units and plants containing such units for processing lubricants, aviation fuels and components, mineral oil, natural and refinery gases, and petrochemicals	4151
Artillery (guns, howitzers, cannons, mortars, tank destroyers, rocket launchers, military flame throwers, recoilless rifles), and components and parts	ML-2
Automatic cycle equipment, grinding machines for	4027
Automatic, electronic, controlling units (industrial process)	45 08
Automatic equipment for controlling diameter on wires and cables	1354
Automatic pilots and parts thereof, except marine type for surface vessels - See list for exception on civil aircraft types	1485
Automatic sizing equipment, grinding machines for	4027

Approved For Release 2001/08/28 শার্ম-মার্টি স্কুটি বিশ্বনির প্রতিষ্ঠিত বি

- 5 -

Automotive vehicles, n.e.s., built to military specifications which differ materially from their normal commercial specifications	1450
Aviation fuels or components thereof, equipment (including plants containing such equipment) for the extraction, production, refining, or treatment of - See list for specifications	4151
Azides of lead and sodium	1701
Ball bearings and ball bearings parts - See list for specifications	1601
Balloons (non-expansive) in excess of 3,000 cubic feet capacity, associated equipment and components	ML-10
Barium styphnate tetrazine and detonating or priming compositions (mixtures) containing this chemical	1701
Batteries, submarine type	ML-9
Bayonets	ML-17
Bearings, anti-friction (ball, roller) and parts - See list for specifications	1601
Beryl (excluding gem grades) and ores	AE 12
Beryllium metal (excluding windows for medical X-ray machines) and alloys containing more than 50% beryllium; oxides and compounds	AE 12
Beryllium oxide (97% or more) suitable for use in refractories, and crucibles, moulds, and pouring rods composed of this material	AE 13
Biological warfare materials, equipment for the dissemination and defense against such materials and components and parts for such equipment	ML-17
Bits, rotary rock drill types	1150
Blending agents, for aircraft fuels, thermal stabilizers, and high octane fuels (aviation grade alkylates, isopentane, and neohexane fuels only)	1789
Blocks, crown or traveling, for oil derricks	4150
Blow cut preventers used for oil well drilling and exploration equipment	4150

Approved For Release 22004798/28-ECIATRDP#8-02646R000100020001-4

- 6 -

Flowers and compressors, (turbo, centrifugal, and axial flow types), wholly made of or lined with aluminum, nickel, or alloy containing 60% or more nickel and having a capacity of 60 cu. ft. per minute or greater	AE-30
Blowers and compressors, centrifugal and axial flow - See list for specifications	1380
Eoilers, marine steam, designed to operate at temperatures of 1100 F (593 C) or above	1441
Bomb sights, components, parts, accessories and attachments	ML- 5
Bombing computers, components, parts, accessories and attachments	ML-5
Eombs, guided or unguided, apparatus for the launching and discharging of bombs, and specifically designed components and parts for the bombs and apparatus described above	ML-4
Bombs, machinery, equipment, and gear for the manufacture of - See intrepretative note for coverage	ML-18
Foring and turning mills (vertical), automatic cycle types	4001
<u>Foring machines</u> for jet engine compressor cores	1086
Eoring machines, jig, with tables possessing any traverse exceeding 44 inches	1002
Boron compounds and mixtures, including boric acids- See list for specifications	17 15
Boron metal and minerals (borax), all types	1715
Bottom hole pumps used for oil well drilling and exploration	4150
Erass fabrications for primer anvils	ML-16
Breathing equipment (pressurized) for use in military aircraft	ML-10
Broaching tools, external surface, designed for the production of jet engine blades and discs	1087
Broaching tools, grinding machines for	4027
Bronze fabrications for primer anvils	ML-16
Bullet cups (gilded metal, clad steel), fabrications for	ML-16

Approved For Release 2001/08/26 - CENA-REDP 78-10-26-46-FR0-00-100020001-4

-7-

Bullets, machinery, equipment and gear for the manufacture of - See intrepretative note for coverage	ML-18
Cables - coaxial type (including submarine cables) designed for telecommunication purposes (including radar), except those types commonly used for domestic radio and television receivers	1525
Cable, communications type, containing more than one pair of conductors, and any conductor exceeding 0.9 mm in diameter - See list for exceptions and conditions governing this entry	1526
Cables, buoyant, electric conducting type, suitable for sweeping magnetic mines	1430
Cable making machinery designed for making multipair electric cable for telecommunication purposes - See list for specifications	1353
Cable making machinery designed for making coaxial cables - See list for specific types	1354
Cameras, air reconnaissance and other cameras designed and/or used for military purposes, and associated equipment - See list for specifications	ML-12
Cameras, high speed - See list for specifications	1585
Cannon and specially designed components and parts	ML-2
Capacitors, tantalum electrolytic, n.e.s.	1562
Carbines and specially designed components and parts	ML-1
Carbon black furnaces	4350
Carnotite and other uranium ores	AE 1
Cartridge link, fabrications for	ML-16
Cartridge strip, rolled brass	ML-16
Cartridges, machinery, equipment and test gear for the manufacture of - See intrepretative note for coverage	ML- 18
Casinghead and christmas tree assemblies used in oil well drilling and exploration equipment	4150

Approved For Release-2011/08028:1012-RDP-78-02646R000100020001-4

Catalytic cracking or reforming units Catalytic cracking or reforming units Catalytic for use on aircraft carriers or other vessels of war Catapults and cartridge activated devices utilized in emergency escape of personnel from aircraft Cathode ray oscilloscopes with band width greater than 12 mc per second - See list for other specifications Cathode-ray tubes - See list for specifications Cathode-ray tubes - See list for specifications Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to mitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 4460	Casting machines, centrifugal, capable of casting tubes 6 ft or more in length with wall thickness of 2 in. and over	ML-18
Catapults for use on aircraft carriers or other vessels of war ML-9 Catapults and cartridge activated devices utilized in emergency escape of personnel from aircraft Cathode ray oscilloscopes with band width greater than 12 mc per second - See list for other specifications Cathode-ray tubes - See list for specifications Cathode-ray tubes - See list for specifications Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 50% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Castings (steel and alloy) for guns and arms	ML-16
Catapults and cartridge activated devices utilized in emergency escape of personnel from aircraft Cathode ray oscilloscopes with band width greater than 12 mc per second - See list for other specifications Cathode-ray tubes - See list for specifications Cathode-ray tubes - See list for specifications Cathode-ray tubes - See list for specifications Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Catalytic cracking or reforming units	4151
Cathode ray oscilloscopes with band width greater than 12 mc per second - See list for other specifications Cathode-ray tubes - See list for specifications 1541 Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 4460	Catapults for use on aircraft carriers or other vessels of war	ML-9
Cathode ray oscilloscopes with total specifications Cathode-ray tubes - See list for other specifications Cathode-ray tubes - See list for specifications Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 4460	Catapults and cartridge activated devices utilized in emergency escape of personnel from aircraft	ML-10
Cementing equipment for oil well drilling or exploration Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Cathode ray oscilloscopes with band width greater than 12 mc per second - See list for other specifications	1584
Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 1106	Cathode-ray tubes - See list for specifications	1541
extraction of radioactive substances Centrifugal testing apparatus or equipment - See "Testing apparatus" 1576 for more complete description Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and effense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 4460	Cementing equipment for oil well drilling or exploration	4150
Centrifuges capable of the enrichment or separation of isotopes, made of or lined with aluminum, nickel or an alloy containing 60% or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Centrifugal counter-current solvent extractors designed for the extraction of radioactive substances	1106
of or lined with aluminum, nickel or an alloy containing copy or more nickel, with a peripheral speed of 1000 ft per second or more; and centrifugal bowls made of above materials Ceramic envelope covered tubes Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Centrifugal testing apparatus or equipment - See "Testing apparatus" for more complete description	15 7 6
Chemical equipment for the conversion of nitrogen tetroxide to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	of or lined with aluminum, nickel or an alloy containing coper more nickel, with a peripheral speed of 1000 ft per second	AE-29
Chemical equipment for the conversion of introgen scaled to nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or mixtures thereof Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	Ceramic envelope covered tubes	1558
Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such equipment Chlorine trifluoride Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s.	nitric acid of 98 percent concentration or higher, or for the concentration of nitrogen tetroxide and/or nitric oxides or	1101
Christmas tree assemblies used in oil well drilling and exploration Civil aircraft, n.e.s. 4150	Chemical warfare agents and equipment for the dissemination and defense against such agents and components and parts for such	ML-7
exploration Civil aircraft, n.e.s.	Chlorine trifluoride	AE-15
Civil aircraft, n.e.s.		4150
Climatic Conditioning chambers - See list for specifications ML-1	Civil aircraft, n.e.s.	4460
	Climatic Conditioning chambers - See list for specifications	ML- 19

Coaxial cable making machinery - See list for specifications	1354
Coaxial-type cables (including submarine cable) designed for telecommunication purposes, including radar, except those types commonly used for domestic radio and television receivers	1525
Cobalt steel alloys containing 50% or more iron and 6% or more of cobalt, except permanent magnets containing 25% or less cobalt content	1635
Cobalt alloys containing 50% or more cobalt; or 19% or more cobalt combined with 14% chromium and less than 1% carbon or more than 3% molybdenum	1648
Cobalt alloys, n.e.s., containing 19% or more cobalt and 14% chromium in combination, and scrap thereof	4648
Cobalt compounds containing 40% or more cobalt	1720
Cobalt compounds, n.e.s See list for exceptions	4720
Cobalt metals and raw materials including white and red alloys	1648
Cobalt or molyboenum valves, cocks and pressure regulators and parts therefore of 50% purity, eitner separately or combined	1133
Cocks, valves, and pressure regulators, n.e.s., designed to operate at temperatures below 130°C or incorporating materials and parts as specified under "pressure regulators"	1133
Columbium and/or tantalum steel alloys, containing 50% or more iron and 1.5% columbium and or tantalum	1635
Columbium (niobium) raw materials, metals and columbium based alloys (See list for specifications) and scrap forms covered by this item	1649
Cementing equipment used for oil well drilling exploration	4150
Communication and detection equipment of a kind using infra-red radiation or ultrasonic waves; and specialized parts therefore	1502
Communication cable (including submarine cable) - See list for specifications and exceptions	1526
Communication equipment designed to provide secrecy facilities on eitherwoice, telegraph line or radio communication circuits other than those utilizing frequency inversions or band scrambling techniques	1572
Approved For Release 2001/08/28 : CIA-RDP78902646R000100020001-4	

Communication equipment employing tropospheric, ionospheric or meteoric scatter phenomena and specially designed subassemblies, parts and test equipment therefor	1503
Communication equipment specially designed for use in aircraft and specialized parts and components therefore - See list for exceptions	1501
Communication transmission equipment, line type, and specialized components, accessories and sub-assemblies - See list for specifications and exceptions	1 523
Compasses, gyroscopic equipment and specially designed parts and components - See list for specifications	1485
Compressors and blowers, (turbo, centrifugal, and axial-flow types), wholly made of or lined with aluminum, nickel, or alloy containing 60% or more nickel	AE-30
Compressors or blowers, centrifugal and axial flow - See list for specifications	1380
Compressors and blowers, n.e.s.	4380
Compressor core boring machines and/or compressor turning machines - jet engines type compressors only	1086
Computers, electronic (except business type machines)	1565
Condenser tissue (synthetic film for dielectric use) of 0.0015 in. (0.038 mm) or less capable of use in condensers covered by IL 1560	1920
Construction equipment built to military specifications, specially designed for airborne transport	1325
Containers, jacketed only, of 500 gal. capacity or over, for the storage or transportation of liquid nitrogen, oxygen, hydrogen, ozone, helium, and argon	1145
Control equipment, automatic, for controlling the diameter or eccentricity of extruded dielectric on wire and cable	1354
Control equipment, electronic type, e.g. synchros, resolvers, potentiometers etc See list for specifications	1568
Control equipment for machine tools (cutting and forming, electronic closed loop feed-back type)	1091
Control units, electronic automatic types. See electronic automatic controlling units for complete discription	4508

<u>C-O-N-F-I-D-E-N-T-I-A-L</u>

Converters, liquid oxygen, used for aircraft and missiles	ML-10
Copper munition components including copper rotating bands for shells	ML-16
Coring equipment used in oil well drilling and exploration	4150
Counting equipment (electronic) capable of counting at rates in excess of 1 megacycle per second	1593
Cracking or reforming units (thermal or catalytic), including platforming	4151
Crash helmets, military, for use with aircraft and helicopters	ML-10
Crucibles, moulds, and pouring rods composed of 97% or more by weight of beryllium oxide, magnesium oxide, zirconium oxide, and zirconium oxide stabilized with lime and/or magnesium oxide	AE-13
Crystal signal diodes, excluding photodiodes - See list for specifications	1544
Cutting machines for the sizing of extruded propellants for the production of military explosives	1118
Cyclotetramethylene - tetranitramine (HMX) (military nigh explosive)	ML-8
Deasphalting units for propane	4151
Dehydration presses used in the production of military explosives	1118
Dehydrogenation units for the processing of lubricants (petroleum based or synthetic), aviation fuels or components thereof, mineral oil, natural or refinery gases, and petro-chemicals.	4151
Delay lines, being specialized parts for pulse modulator equipment as specified under this entry	1514
Dephlegmating, fractionating and rectifying columns for use in processing lubricants, aviation fuels and components, mineral oil, natural or refinery gases, and petro-chemicals	4151
Depth charges and components and parts therefor	ML-4
De-sulpherization units for processing lubricants, aviation fuel or components, mineral oil, natural or refinery gases, and petro-chemicals	4151
Detection and communication equipment of a kind using infra-red radiation or ultrasonic waves, and specialized parts therefor	1502

Approved For Release 2001/0<u>8/28 ድ ናለ</u> ይ<u>ተ</u> ይ<u>ተ</u> ይገዷ -02646R000100020001-4

Detection devices, magnetic, pressure, and acoustic for underwater detection and controls and components thereof	ML-9
Detonating and priming compositions, specifically: mercury fulminate, lead azide, lead stypnnate, lead triocyanate, lead dinitroresorcinate, barium styphnate tetrazine, and sodium azide, and detonating or priming compositions (mixtures) containing one or more of these chemicals	1701
Deuterium and compounds, mixtures, and solutions containing deuterium, including heavy water and heavy paraffin, in which the ratio of deuterium atoms to hydrogen atoms exceeds 1: 5000 by number	AE- 5
Deuterium oxide production and/or concentration equipment	1112
Dewaxing units (including centrifugal and solvent dewaxing units such as methylethyl ketone and propane units) used in the production, refining, or treatment of any of the following: lubricants, aviation fuels and components, mineral oil, natural or refinery gases, and petrochemicals	4151
Diamond grinding wheels, sticks, hones, and laps	4387
Diamonds suitable for industrial use, including splints and borts	4385
Diamond wire drawing dies	4386
Dichlorotetrafluoroethane (a fluorinated hydrocarbon)	AE-17
Dielectric synthetic film (condensor tissue) of 0.0015 in. (0.038 mm) or less in thickness capable of use in condensors covered by IL 1560	1920
Die-sinking machines used for profiling and duplicating	4090
Dies, diamond wire drawing types only	4386
Diesel engines, 50 h.p. and over, whose non-magnetic content exceeds 50% of their total weight	1255
Diesel motors (1500 h.p. and over with a rotary speed of 700 r.p.m.) specially designed for submarines, and accessories, components, parts, and attachments therefor	ML-9
Diethylene triamine	1721
Dimethyl hydrazine (unsymmetrical)	1721

Diodes, (crystal signal), point contact type, suitable for use at frequencies higher than 300 mc/s, and specialized parts	1544
Diodes, (crystal signal), junction type, where germanium is not the basic semi-conductor, and specialized parts	1544
Diodes, (crystal signal), junction type (germanium) suitable for frequencies higher than 50 mc/s, and specialized parts	1544
Diodes, crystal (embargoed types only) manufacturing machinery, equipment and test gear, and automatic or semi-automatic assembling machinery, equipment and test gear	1355
Diodes, photo (photo transistors)	1548
Diortho tolyl-urethane, a stablizer for explosives	1703
Diphenylamine	1703
Diphenylurea, unsymmetrical (NN-diphenylura)	1703
Direction finding equipment, airborne - See list for specifications	1501
Direction finding equipment, n.e.s See list for specifications	4501
Diving and underwater swimming apparatus (self contained) - See list for specifications	ML-1
Dosimeters capable of measuring in one exposure dosages above 5 roentgens excepting those designed specially for use with medical radiation equipment	AE-20
Drill bits, rotary rock, having cones or section which rotate freely and independently of the rotation of the body of the bit	1150
Drills, hollow for deep hole drilling machines in which the coolant passes through the drill	1006
Drilling equipment (oil well) - See list for specific types	4150
Drilling machines, deep hole types, in which the coolant passes through the drill	1006
Duplicating and profiling machinery, n.e.s. (planing, shaping, milling or grinding), including die-sinking machines	4090
Duosol solvent processing units	<u> </u>

- 14 -

Echo sounding devices specially designed for military purposes, controls, and components thereof	ML-9
Elastomeric material, fluorinated, including fluorinated silicone rubber, and such organic intermediates for their production as contain 10% or more of combined fluorine	1801
Electric furnances specially designed for the recovery of titanium or zirconium from scrap	1125
Electric motors over 1000 h.p., reversing type, liquid cooled, and totally enclosed, for use in submarines	ML-9
Electric power generating units, mobile types of over 5,000 KW	1266
Electric power generating units of ½KW or over, up to and including 5,000 KW	4265
Electrolytic cells for the production of fluorine	AE-31
Electromagnetic ion separators, including mass spectrographs and mass spectrometers for any purpose	AE-22
Electromagnetic wave absorbers, materials designed or manufactured for use with absorbers of waves exceeding 2 x 10 ⁸ cycles per second and less than 3 x 10 ¹² cycles per second	1561
Electromagnetic waveguides and components thereof as follows: ferrite waveguide components for use at all frequencies; rigid waveguides for use at frequencies in excess of 12,500 Mc/s; flexible waveguides of all types	1537
Electronic aiming devices (fire control) specifically designed for military purposes	ML-5
Electronic assemblies, equipment specially designed for the production of - See list for specific types	1566
Electronic automatic controlling units designed to regulate flow by continuous action as a function of one or more industrial process variables and capable of operating a regulating valve by pneumatic, hydraulic or electric means in response to an AC or DC voltage produced by a measuring unit in the process stream	4568
Electronic components designed for and/or capable of reliable performance in relation to their electrical and mechanical characteristics and maintaining their design service lifetime while operating at temperatures extending from below minus 45°C to above 100°C, or at ambient temperatures of 200°C or higher	1560
Approved For Release 2001/08/28 CIA-RDP78-02646R0001000200	01-4

 $\underline{\mathbf{C}} - \underline{\mathbf{O}} - \underline{\mathbf{N}} - \underline{\mathbf{F}} - \underline{\mathbf{I}} - \underline{\mathbf{D}} - \underline{\mathbf{E}} - \underline{\mathbf{N}} - \underline{\mathbf{T}} - \underline{\mathbf{I}} - \underline{\mathbf{A}} - \underline{\mathbf{L}}$

Electronic computers (except business type machines)	1565
<pre>Electronic closed loop feed back controls for machines tools (cutting and forming), continuous correcting type, and machine tools incorporating above - See list for specifications</pre>	1091
Electronic equipment, specially designed to produce electronic assemblies by (a) depositing or printing on insulating panels, including plates or wafers; or otherwise forming in situ, component parts other than basic wiring; or (b) automatically inserting and/or soldering components on insulating panels including plates or wafers, to which wiring is applied by printing or other means.	1566
Electronic equipment specially designed for military use, and components and parts therefor	M L-1
Electronic instruments operating at frequencies in excess of 300 Mc/s	1529
Electronic navigation and location finding aids designed for military use	ML-1
Electronic sorting apparatus for automatically sorting electronic components in respect to their electrical characteristics	1530
Electronic storage tubes and image converters (See "image converters")	1555
Electronic valve -making machinery, equipment and test gear (including components or sub-assemblies) designed for the manufacture and/or automatic or semi-automatic assembly of embargoed electronic valves, transistors and crystal diodes	1355
Electronic valves (tubes) and specialized parts (e.g. high frequency types) - See list for special types	1558
Engines, diesel, (50 h.p. and over), whose non-magnetic content exceeds 50% of their total weight	1255
Engines, diesel (1500 h.p. and over) with a rotary speed of 700 RPM, specially designed for submarines, and accessories, components, parts and attachments therefor	ML-9
Engines, jet, machines specially designed for the manufacture of - See list for specifications	1086

Approved For Release 2001108/28_ECIA-RDP 8102646R000100020001-4

- 16 -

Esters of diabasic saturated aliphatic acids combined with either saturated aliphatic monohydric alcohols or polyglycols and all fluoro-alcohol esters - See list for specifications and exceptions	1781
Ethyl and methyl centralites: stablizers for explosives	1703
Ethyl unsymmetrical diphenylurea (ethyl NN-diphenylurea) - a stabilizer for explosives	1703
Ethyl phenyl urethane - a stabilizer for explosives	1703
Ethylene dinitramine (military high explosive)	ML-8
Exploration equipment (oil well) - See list for specific types	4150
Explosives stabilizers - See list for specified items	1703
Explosives (military) production equipment, complete installations and specialized components - See list for interpretive note covering key components	1118
Explosives, high, military type - See list for specific coverage	ML-8
Extractors (centrifugal counter-current solvent extractors), specifically designed for the extraction of radioactive substances	1106
Extrusion (aircraft) working or forming machinery	1081
Extrusion presses used in the manufacture of small arms, cannon, and rocket propellants	1118
Fabrications (brass and bronze) for primer anvils, and fabrications for bullet cups (gilding metal clad steel), cartridge link, primer cap, shell rotating band	ML-16
Feed back controls (electronic), closed loop types for machine tools - See list for specifications	1091
Ferro-columbium (ferro-niobium) and ferro-columbium-tantalum (ferro-niobium tantalum)	1649
Ferro-molybdenum	1658
Ferro-tantalum and ferro-tantalum-niobium	1670
Fieldistors (semi-conductor amplifying devices related to transistors)	1545

- 17 -

Film processing and printing machines designed specifically for military purposes	M L- 12
Film recording devices designed and used for military purposes, and equipment designed to make the recorded information militarily useful, and components and parts	ML -1 2
Film, synthetic, for dielectric use (condenser tissue) of 0.0015 or less in thickness capable of use in condensors covered by Item 1500	in. 1920
Filtration units (including percolation filtration, contact filtration and filtrol fractionation units) for use in the processing of lubricants, aviation fuels or components, mineral oil, natural or refinery gases, and petrochemicals	4151
Fire control equipment and components, acessories, parts, and attachments - See list for specifications	ML-5
Fish and/or whale finding equipment (underwater), and specialize components - See Interpretative Note # 2 for exceptions	d 15 10
Fishing vessels and hulls designed for speeds of 17 knots or over when in full load condition	1416
Fissionable materials	AE-1
Flak suits and parts	ML-13
Flame throwers (military) and specifically designed components and parts	ML-2
Flight instrument systems, integrated for aircraft, including gyro-stabilizers and automatic pilots - See list for excepti	1485 .ons
Flow regulators, continuous electronic automatic types - See "electronic automatic controlling units" for complete definition	4568
Fluorinated nydrocarbons - See list for specifications	AE-17
Fluorinated silicone rubber and other fluorinated elastomeric material and such organic intermediates for their production as contain 10% or more of combined fluorines	1801 1
Fluorine	AE-14
Fluorine liquefying equipment	1110
Fluorine producing electrolytic cells	AE-31

Approved For Release ይባሲተያያ-ድርቲላ ተዋዋ 2000 100020001-4

- 18 -

Fluoro-alcohol esters - See list for exceptions	1781
Forging hammers having a falling weight exceeding 10 tons, "See hammers"for specific coverage of steam, air, mechanical, counterblow, and norizontal impact hammers	1070
Forgings (rough steel forgings) for guns and arms	ML-1
Forming, pre-forming and shaping machinery specially designed for the manufacture of gas turbine blades	1080
Fractionating, meetifying and dephlegmating columns for use in processing lubricants, aviation fuels or components, mineral oil, natural or refinery gases, and petrochemicals	4151
Fractionation (filtrol) units - See "filtration units"	4151
Frequency measuring equipment and frequency standards with an accuracy better than 0.00001%	1529
Fuel thickeners, military, including but not limited to compounds (e.g. octal) or mixtures of such compounds (e.g. napalm), which when added to petroleum products provide a gel-type incendiary material for use in bombs, projectiles, flame throwers or other implements of war	ML-4
Fuels, chemical base, high energy solid or liquid types for military propellants	ML-8
Fuels, jet (aircraft turbine engine fuel) - See list and interpretative Note # 5 for specifications	1770
Fuels, liquid for jet aircraft use, including petroleum, containing high energy components or compounds thereof having a gross calorific value of not less than 13,000 calories per gram	1770
Fulminate of mercury	1701
Furfural solvent extraction units	4151
Furnaces, carbon black	4350
Furnaces, electric, specially designed for the recovery of titanium and/or zirconium from scrap	1125
Furnaces, vacuum, designed to operate at pressures lower than 0.1 mm of mercury and at temperatures higher than 1100°C	A E-28

Approved For Release 2001/08/<u>886 GIA-RDDZ8-02646R009</u>100020001-4

- 19 -

Gas (liquefied) containers, jacketed only, for the storage or transportation of liquefied gases, including mobile units of 500 gallons capacity or over, designed for liquid nitrogen, oxygen, hydrogen, ozone, helium or argon	114
Gas (natural or refinery), equipment including plants containing such equipment for the extraction, production, refining or treatment of - See list for specifications	415
Gas liquefying equipment as follows: (a) operating at 300 p.s.i. or over and producing one ton or more liquid gas per day - See list for exceptions. (b) liquid fluorine producing equipment (c) equipment for the separation of helium from natural gases	1110
Gas projectors, military, and specifically designed components and parts	ML-2
Gas turbine blades, machines and equipment specially designed for the manufacture or measurement of - See list for examples	1080
Gasoline, aviation grades, 100 octane and over	4773
Gasoline, wide cut types, capable of use as jet fuels - See appendix to list for specifications	1770
Gear grinding machines, generating type, of 30 inches work diameter and above	1088
Gear making and/or finishing machinery capable of the production of gears of a module finer than 0.5 mm. (diametral pitch finer than 48)	1088
Gear making machinery, n.e.s. (all machinery designed for the manufacture and/or finishing of machine cut gears)	4088
Generating units, electric mobile types of over 5000 KW	1266
Generators, induction rate, for use with control equipment - See list for specifications	1568
Germanium compounds, n.e.s., including germanium dioxide	4753
Germanium having a resistivity of 50 ohm per cm or better	1653
Germanium, n.e.s.	4653
Germanium purifying and processing equipment, except equipment designed for zone purification	1360

Approved For Release 2001/08/28 : CIA-RDP78-02646R000100020001-4

<u>C-O-N-F-I-D-Ŀ-N-T-I-A-L</u>

Approved For Release 2001108428 : CIA-RDP78-02646R000100020001-4

- 20 -

Gilding metal clad steel bullet cups, fabrication for	ML-1c
Gilding metal clad steel munitions components and material	ML-lo
Graphite, artificial, in the form of blocks or rods from which a cube of 2 inches side or greater can be cut, and having a boron content of one part per million or less - See list for specifications	AE-34
Greases, silicone, lubricating type, capable of operating at temperatures of 180°C or higher and having a drop point to 220°C or higher	1755
Grenades, including smoke grenades, and all specially designed components or parts	ML-4
Grinders, contour profile types	4019
Grinders, rotor, for jet engine manufacture	1086
Grinding heads designed for operations at speeds in excess of 80,000 r.p.m., and machines designed for their utilization	1016
Grinding machines, specially designed for the manufacture of gas turbine blades	1080
Grinding machines for gear production, generating types of 36 inches work diameter or above	1088
Grinding machines utilizing embargoed "grinding heads"	1016
Grinding machines, jig, with tables possessing any traverse exceeding 44 inches	1002
Grinding machines (profiling and duplicating), n.e.s.	4090
Grinding machines, roll (machines fitted with, or capable of being fitted with, cambering device only)	4023
Grinding machines for use with broacning tools, auto cycle or auto sizing equipment	4027
Ground equipment, n.e.s., and parts designed specifically for military aircraft use	ML- 10
Ground equipment, n.e.s., developed solely or used mainly for aircraft, except ground or airfield equipment of types in normal civil use	1460
Guanidine nitrate	1742

Approved For Release 2001/08/28 ሷ ርህ Δምጽ ጋዋ 7월 - ዐርር 646 ሺ ዓርር 100020001-4

- 21 -

Guidance equipment for fire control operations, and components, parts, and attachments for such equipment	ML-5
Guidance, tracking and remote control equipment, n.e.s., suitable for use with aircraft (piloted or pilotless) and weapons (guided or unguided)	1518
Guided missiles and specifically designed components and parts, including guided missiles power plants	ML-4
Gun barrel rifling, broaching and trepanning machinery	ML-18
Gun laying (fire control) equipment, components, parts, accessories and a ttachments	ML-5
Guns (artillery) and components and parts for same	ML-2
Guns, machinery, equipment and test gear for the manufacture of - See interpretative note for coverage	ML-18
Guns, self propelled types, and specially designed components and parts	ML-6
Gun carriers and tractors specifically designed for towing artillery and specially designed components and parts	ML-6
Gun mounts, naval	ML-9
Gun perforating equipment used for oil well drilling and exploration	4150
Gun sights specially designed for military purposes and components and parts	M L- 5
Gyromagnetic compasses, and components and parts thereof - See list for exceptions	1485
Gyroscopes of high precision and miniaturized gyroscopes which are designed for use in ship inertia navigation systems or in the guidance systems of weapons and military aircraft, and specially designed parts and components	1485
Gyroscopic aiming devices (fire control) specially designed for military purposes, and components and parts thereof	M L- 5
Syro compasses (North seeking only), components and parts thereof - See list for specifications	1485
See list for exceptions granted civil aircraft types	1485

Approved For Relea<u>se_2901/08/28 <u>:</u> <u>GIA_R</u>B<u>PR</u>78-02646R000100020001-4</u>

- 22 -

Gyro - stabilizers, n.e.s., and parts thereof, except those for stabilizing an entire surface vessel	1485
Half tracks (military type), and components and parts thereof	ML-6
Halogenated silicone fluids	1755
Hammers, forging, having a falling weight exceeding 10 tons	1070
Hammers, forging, counter-blow, of rated sizes of 25,000 kgs/meters or more	1070
Hammers, forging, steam, air or mechanical, of rated sizes exceeding 10 tons	1070
Hammers, forging, horizontal impact, hydraulically actuated, 10,000 foot pounds or over rated size	1070
Heat exchangers (tubular) and components thereof (except aluminum tubing) with flow contact surfaces made of aluminum, nickel, titanium, zirconium or alloys containing 60% or more nickel, and designed to operate at pressures of 300 p.s.i. and above	AE-33
Heavy paraffin and heavy water in which the ratio of deuterium atoms to hydrogen atoms exceeds 1:5000 by number	AE- 5
Helicopters, specially designed for military purposes and associated equipment, components and parts	ML-10
Height, position and range finders specially designed for military purposes, and specially designated components, parts, and accessories	ML-5
Helium separation equipment, for the separation of helium from natural gases	1110
Helmets, military, other than aircraft crash types	ML-13
Helmets, crash types, for military aircraft use	ML-10
Hexanitrodiphenylamine (military high explosive)	ML-8
High frequency electronic instruments, operating at frequencies above 300 mc/s, except radio spectrum analysers - See IL 1533	1529
High octane blending agents for aircraft fuels	1789
HMX (cyclotetramethylene - tetranitramine) - (military high explosive)	ML-8

Hose, rotary vibrator hose and rotary drilling hose, used in oil well drilling and exploration, high pressure types only	4150
Howitzers and specially designed components and parts thereof	ML-2
Hulls for embargoed fishing vessels (i.e. 17 knots), embargoed seagoing vessels including coasters (i.e. 20 knots), and hulls made wholly or primarily of non-magnetic materials	1416
Hydraulic fluids, synthetic, having a viscosity of not more than 4,000 centistokes at -54°C and not less than 1.5 centistokes at / 150°C	1702
Hydraulic fluids, petroleum based, possessing all of the following characteristics: (a) kinematic viscosity of 4.0 centistokes or greater at 210°F (98.9°C); (b) pour point of -30°F (-34.4°C) or lower; (c) viscosity index (V.I.) of 130 or higher	1793
Hydraulic presses with total rated pressures of over 5,000 tons (long or metric)	1072
Hydrazine; hydrazine hydrate; hydrazine nitrate; diethyl triamine; and unsymmetrical dimethyl hydrazine	1731
Hydrocarbons, fluorinated - See list for coverage	AE-17
Hydrogen peroxide (50% strength or over)	1732
Hydrogen thyratrons of any rating	1559
Hydrogenation equipment (and plants containing such equipment) designed to operate at 300 p.s.i. or over (except equipment specially designed for the production of ammonia or methanol) and used in the processing of lubricants, aviation fuels or components, mineral oil, natural or refinery gases, and petrochemicals	4151
Ice breakers of 10,000 shaft h.p. or over	1405
Image converters and electronic storage tubes, including memory transformers of radar pictures and ruggedized vidicon-type tubes (excluding commercial television broadcasting camera tubes and commercial standard X-ray amplifier tubes)	1 55 5
Incendiary materials (gel-type), components which when used in combination with petroleum products produce gel-type incendiary materials	ML-4
Induction hardening machines for tank turret rings and sprockets	ML-18

Approved For Release_N2<u>P01/L08/28</u>8<u>N</u>-<u>Ф</u>IA<u>F</u>RDP.78-02646R000100020001-4

- 24 -

Induction rate generators for electronic control equipment - See list for specifications	1568
Inertial platforms (gyroscopic device) for use in guided missiles and components, parts, accessories and attachments	ML-5
Infra-red equipment (military) and specialized components therefor, n.e.s.	ML-15
Infra-red radiation equipment for communications and detection, and specialized parts therefor	1502
Insulation applying machinery for multipair electric tele- communications cables, n.e.s.	1353
Insulation applying machinery for applying separators to air spaced coaxial electric cable	1354
Instrument systems, integrated flight type for aircraft, including gyro stabilizers and automatic pilots - See list for exceptions permitted for civil aircraft types	1485
Ion microscopes having aresolving power better than 10 angstrom units	1579
Ion separators, electromagnetic, including mass spectrographs and mass spectrometers, for any purpose	AE-22
Ion sources, positive, suitable for use in mass spectrographs and spectrometers and capable of handling uranium hexafluoride	AE-24
Isomerization units for the processing of lubricants, aviation fuels or components, mineral oil, natural or refinery gases and petrochemicals	4151
Isopentane (a nigh octane blending agent for aircraft fuel)	1789
Jamming apparatus (i.e., apparatus specially designed to jam or interfere with radio reception) and specialized parts therefor	1507
Jet engine blades and discs, external surface broaching tools specially designed for the construction of	1087
Jet engines, machines specially designed for the manufacture of, as follows: compressor core boring machines, compressor and turbine disc turing machines, and rotor grinders	1086
Jet fuel (aircraft turbine engine fuel) - See list and interpretive note # 5 for specifications	1770

Approved For Release 2001/08/28:-CIA-RDP-78-12648-R0-00-100020001-4

- 25 -

Jig boring and/or grinding machines with tables possessing any traverse exceeding 44 inches	1002
Jigs and fixtures and other metal working implements or accessories for use in manufacture of ammunition, firearms, ordnance and other military stores and appliances	ML-18
Junction type crystal signal diodes and specialized parts in which the basic semi-conductor material is not germanium, or germanium junction diodes for use at frequencies higher than 50 mc/s	1544
Kel-F (polytrifluorochloroethylene) pipe and tubing, and pipe and and tubing made of or linedwith Kel - F	1142
Kel-F (polytrifluorochloroethylene) valves, cocks or pressure regulators or parts therefor	1133
Kerosene type jet fuel (aircraft turbine engine fuel) - See appendix to list for specifications	1770
Klystrons, amplifier, and specialized parts therefor	15 58
Lathes, right angle (T), specially designed for making gas turbine discs	1042
Lathes, spinning, except those with a spindle drive motor of 25 h.p. or less	1075
Lead azides, lead styphnate, lead triocyanate or lead dinitroresorcinate and detonating or priming compositions (mixtures) containing one or more of these chemicals	1701
Lift trucks, n.e.s., built to military specifications differing materially from normal commercial specifications	1450
Line communication transmission equipment and specialized components, accessories and sub-assemblies - See list for specifications and exceptions	1523
Linear induction potentiometers (electronic control equipment) - See list for specifications	1568
Liquefied gas storage or transportation containers (jacketed only) including mobile units or 500 gallons capacity or over, designed for liquid nitrogen, oxygen, hydrogen, ozone, helium, and argon	1145
Liquefying equipment for gases - See list for specifications	1110

Liquia fuel, including petroleum, containing nigh energy components or compounds thereof, having a gross calorific value of not less than 13,000 calories per gram	1770
Liquid oxygen converters used for aircraft and missiles	M L-1 0
Lithium isotopes, equipment specially designed for the separation of	AE-18
Lithium metal, compounds, ores, and concentrates - See list for exception permitted for medical lithium compounds	AE-35
Location apparatus (underwater) designed for detecting and/or locating objects by magnetic or acoustic or ultrasonic methods, and components, parts, attachments and accessories - See list for exceptions. Military types covered under ML-9 (Detection Devices)	1510
Lubricants (petroleum based or synthetic), equipment, and plants containing such equipment, for the production, refining or treatment of - See list for specifications	4151
Lubricating greases (silicone) capable of operating at temperatures of 180°C or higher and having a drop point of 220°C or higher	1755
Lubricating oils and greases, synthetic (ester type) - See list for specifications and exceptions	1781
Machine guns and specically designed components and parts	ML-1
Machine tools (cutting and forming), incorporating electronic closed loop feed back controls, continuous correcting type - See list for specifications	1091
Machinery (including lathes, presses, drilling and boring machines, loaders, forging and planing machines) used for examination, manufacture, testing and checking of munition list items	M L-1 8
Magnesium base alloys, crude or semi-fabricated, containing 0.4% or more zirconium, or 1.5% or more thorium, or 1% or more rare earth metals (cerium mischmetal) and scrap forms covered by this item	1654
Magnesium oxide (97% or more by weight) suitable for use in refractories and crucibles, moulds and pouring rods composed of the foregoing	AE-13
Magnetic compasses, transmitting types, designed for submarines, and	1485

- 27 -

Magnetic metals of all types and forms possessing any of a group	1631
of listed specifications, including thickness, permeability, remanence, energy potential and core loss	
Magnetic recorders and/or reproducers (other than those designed for voice or music), specialized recording media, parts and components therefor	1572
Magnetometers of the following types: (a) fluxgate, (b) electron beam sensing, (c) paramagnetic, (d) nucleonic, and specialized parts therefor	1571
Magnets, permanent, all types, n.e.s.	4631
Marine depth sounders (underwater) and specialized components - See list for exceptions	1510
Marine steam boilers designed to operate at temperatures of 1100°F (593°C) or above	1441
Mass spectrographs and mass spectrometers (electromagnetic ion separators) - See list for specifications	AE-22
Measuring equipment used in the measurement of gas turbine blades - See list for examples	1080
Measuring equipment (frequency) and frequency standards with an accuracy better than 0.00001%	1529
Measuring (time interval) and counting equipment - See list for specifications	1593
Mechanical presses with total rated pressures of over 5,000 tons	1072
Mechanical presses with rated pressures between 1000 and 5000 tons	4072
Memory transformers of radar pictures	1555
Mercury fulminate, and detonating and priming compositions containing this chemical	1701
Mesh, woven wire, composed of wire containing 95% or more nickel and containing 60 or more wires per linear centimeter	AE-1 0
Methyl unsymmetrical diphenyluria (methyl-NN-diphenylurea) (stabilizer for explosives)	1703
Microflash equipment (photographic) - See "photographic microflash" for specifications	1585

Approved For Release 2001/08/28: CIA-RDP78-02646R000100020001-4

- 28 -

Microscopes, ion type, having a resolving power better than 10 Angstrom units	1579
Microsyns - instruments rated to have the same characteristics as embargoed synchros (covered by electronic control equipment)	1508
Military arms, ammunition, appliances and machines covered by Munitions List items, machinery, equipment and gear specially designed for their examination, manufacture, testing and checking	ML-1
Military electronic equipment, components and parts therefor	ML-1
Military explosives, installations for the production of, and specialized components - See list for interpretive note covering key components	1118
Military half tracks and specifically designed components and parts	ML-6
Military smoke, gas and pyrotechnic projectors, and secifically designed components and parts	M L- 4
Military television signting units for use in aircraft fire control systems, and components, accessories and attachments - See interpretative note	M L- 5
Military vehicles, n.e.s., and specifically designed components and parts - See list and interpretative notes for specifications	ML-6
Military fuel thickeners - See "fuel thickeners" for examples of this item	М L- Ц
Military training equipment, and specifically designed components, parts, attachments, and accessories	ML-1
Millers, airplane spar	1051
Milling (planer) machines and combination planer and planer milling machines for work pieces 72 inches wide and over or 20 feet long and over	4052
Milling machines, specially designed for the manufacture of gas turbine blades	1080
Milling machines, specially designed for the milling of aircraft skin	1081
Milling machines (profiling and duplicating), n.e.s.	4090

Approved For Release 2001/08/2<u>8 - ՀԱԳ-ԲԵՐԻ 18-02646-Բ</u>Ը0100020001-4

- 29 -

Mineral oil equipment, and plants containing such equipment, for the extraction, production, refining or treatment of - See list for specifications	4151
Mines and apparatus, and devices for the handling, control, activation, laying, sweeping, discharging, detonation or detection of such apparatus and all specifically designed components and parts therefor	M L -4
Mine sweeping cable, buoyant electric conductors, suitable for sweeping magnetic mines only	1430
Missile tracking and guidance equipment and specifically designed components, parts, accessories and attachments	ML-5
Missiles, guided or unguided, and apparatus and devices for the nandling, control, activation, launching, discharging, detonation or detection of such apparatus, and all specifically designed components and parts therefor	ML-4
Mobile containers (jacketed only) for the transportation or storage of liquefied gases, including units of 500 gallons capacity or over designed for nitrogen, oxygen, hydrogen, ozone, helium, and argon	1145
Mobile repair shops, military type, and specifically designed components or parts	M L- 0
Modulators and modulator amplifiers specifically designed for "transmitters and transmitter amplifiers" covered by this item	1517
Modulatorgas - discharge tubes - See "thyratron" for specifications	1559
Modulators, pulse, capable of providing electronic impulses exceeding 150 KW, or of a duration less than 1/10 microsecond, and pulse transformers, pulse forming equipment and delay links being specialized parts of such modulators	1514
Molybdenum steel alloys containing 50% or more iron and 10% or more molybdenum (but 5% or more molybdenum in any alloys containing more than 14% chromium)	1635
Molybdenum metal (including wire, tubing, and platinum clad molybdenum tubing), <u>ferro-molybdenum</u> , and alloys containing 60% or more molybdenum - See list for exception on coverage of wire	1658
Molybdenum disulphide, 80% or higher concentration	1658

Approved For Release 2001/08/28 : CIA-RDP78-02646R000100020001-4

- 30 -

Molybdenum or cobalt valves, cocks or pressure regulators of 50% purity, either separately or combined and parts therefor	1133
Monazite and monazite sand (thorium)	AE-1
Monochlorodifluoromethane (fluorinated hydrocarbon)	AE-17
Mortars (cannon) and all specifically designed components and parts	ML-2
Motors, diesel, 1500 h.p. and over, with rotary speeds of 600 RPM and over, specially designed for submarines	M L- 9
Motors, diesel, 50 h.p. and over whose non-magnetic content exceeds 50% of their total weight	1255
Motors, electric, specially designed for submarines, i.e., over 1000 h.p., reversing type, liquid cooled and totally enclosed	ML - 9
Motors, servo (control equipment) gear-head or plain, designed to operate at more than 300 cycles per second and/or having torque-to-inertia ratio of 3500 radians per second per second or greater	1568
Moulds, crucibles and pouring rods composed of 97% or more by weight cf beryllium oxide, magnesium oxide, or zirconium oxide or composed of zirconium oxide stablized with lime and/or magnesium oxide	AE-13
Mufflers for firearms (silencers)	ML-18
Multipair electric cable (telecommunications) making machinery - See list for specifications	1353
Munitions components (i.e. fabrications, forgings, etc.) and materials - See list for specifications	ML-16
Munitions list arms, ammunition, appliances and machines, specialized machinery, equipment and gear for the examination, manufacture, testing and checking of these items	M L -18
Napalm and similar mixtures used as military fuel thickeners	ML-4
Natural gas equipment (including plants containing such equipment) for the extraction, production or refining of natural gas - See list for specifications	4 1 51
Naval gun mounts	ML - 9
Navigational aids, n.e.s., - See list for specifications	4501

Approved For Release 2001/08[28]:-©HA-RDD78-02646R000100020001-4

- 31 -

Navigation and Location finding aids (electronic) used for military purposes	ML-1
Navigation equipment (airborne) and specially designed components and parts, and ground and marine equipment for use therewith - See list for specifications	1501
Neohexane - a blending agent for nigh octane aircraft fuels	1789
Nets for protection against submarines and torpedoes	ML-9
Nickel, metal and nickel based alloys, n.e.s., and scrap forms covered by this item	406 1
Nickel-bearing steel alloys, n.e.s., containing a total of 32% or more alloying elements - See list for exceptions	1635
Nickel, raw materials, nickel base alloys (alloys containing 32 % or more nickel in any form) and scrap forms of nickel base alloys covered by this item - See list for exceptions	1661
Nickel wire containing 95% or more nickel, 0.10mm or less in diameter	AE-9
Nickel woven wire mesh composed of wire containing 95% or more nickel and containing 60 or more wires per linear centimeter	AE-1
Night sighting equipment, including infra-red equipment for use with fire control apparatus, and specially designed components, parts, accessories and attachments	M L- 5
Niobium (columbium) raw materials, metals, niobium based alloys (See list for specifications) and scrap forms covered by this item	16 49
Niobium and/or tantalum steel alloys containing 50% or more iron and 1.5% or more niobium and/or tantalum	1635
Nitrators, continuous types, used in the manufacture of military explosives	1118
Nitric acid, equipment for the conversion of nitrogen tetroxide to nitric acid of 98% concentration or higher	1101
Nitric acid, fuming	ML-8
Nitric oxide and/or nitrogen tetroxide and mixtures thereof, equipment for the concentration of	1101
Nitrobenzene solvent extraction units and plants containing such units	4151

Approved For Release 2001108128 - CIA-RDP 18-02646R000100020001-4

- 32 -

Nitrocellulose, with nitrogen content over 12.2% and other solid propellant compositions	M L- 8
2-ivitrodiphenylamine (a stabilizer for explosives)	1703
Nitrogen tetroxide concentration equipment and equipment for conversion of nitrogen tetroxide to nitric acid (98% concentration or higher)	1101
Nitroglycerine and nitrostarch (military high explosives)	M L- 8
Witroguanidine	1741
P-Nitromethylaniline (a stabilizer for explosives)	1703
Nuclear reactors	AE-36
Octal and similar compounds used as military fuel thickeners	M L -4
Oil derricks, crown and traveling blocks for	4150
Oil well drilling and exploration equipment - See list for specific types covered	4150
Oils and greases, synthetic, lubricating (ester types) - See list for specifications and exceptions	1781
Oscilloscopes (cathode ray) with band width greater than 12 mc per second and specialized parts therefor - See list for other specializations	1584
Oxygen (liquid) converters for aircraft and missile use	M L-1 0
Panoramic radio receivers and specialized parts therefor - See "radio receivers" for description	1516
Farachutes (military) used for combat personnel, cargo dropping and aircraft deceleration	ML-10
Paraffin (heavy) in which the ratio of deuterium atoms to hydrogen atoms exceeds 1:5000	AE-5
Pentaerythritol tetranitrate	1744
Ferforating equipment, gun type, for oil well drilling or exploration	4150
Feriscopes specially designed for military purposes and components, parts, accessories and attachments	M L- 5
Peroxiae (hydrogen), 50% strength and over	1732

- 33 **-**

Petrochemicals, equipment (including plants containing such equipment) for the extraction, production, refining, or treatment of	4151
Petroleum based jet fuels containing nigh energy components having a gross calorific value of not less than 13,000 calories/grammes	1770
Phenol processing units	4151
Photo cells, including photoelectric cells, photo-conductive cells and photo-transistors - See list for specifications	1548
Pnotoclinometers (oil well drilling and explctation equipment	4150
Photo diodes (photo-transistors)	1548
Photographic equipment as follows: nign speed cameras and micro- flash equipment - See list for specifications	1585
Photographic equipment designed for military purposes, components and parts- See list for specifications	ML-12
Photographic micro-flash equipment capable of giving a flash of 1/100,000 second or shorter, at a minimum recurrence frequency or 200 flashes per second	1585
Photomultiplier tubes - See list for specifications	1549
Photo transistors (photo-conductive cells including photo-ciodes), with a response time constant of 1 milli-second or less measured at the operating temperature of the cell for which the time constant reaches a minimum, and those with a peak sensitivity at a wave length longer than 12,000 Angstrom	1548
Picric acid (trinitrophenol)	1748
Pipe or tubing made of, or lined with, polytetrafluoroethylene (Teflon) or polytrifluorochloroethylene (Kel-F)	1142
Pipe (seamless) and tubing (seamless) made of tantalum - See list for exceptions granted for surgical grade tantalum	1070
Pistols and machine pistols, components and parts	ML-1
Pitchblende and other uranium ores with uranium content exceeding 0.05% by weight	AE-1
Planing machines (profiling and auplicating), n.e.s.	4090

Planing machines, planer milling machines, and combination planer	4052
and planer milling machines with capacity, for work pieces 72 inches (1.80 m) wide and over or 20 feet (6.0 m) long and over	
Flants for the production of titanium and/or zirconium metals, and specialized components thereof	1125
Plate (aircraft) working or forming machinery	1001
Platinum clad molybdenum tubing	1058
Plutonium; alloys and compounds containing plutonium	AE-1
Fneumatic tire casings (military) of a kind specially constructed to be bullet proof or run when deflated	ML-6
Foint contact diodes suitable for use at frequencies higher than 300 mc/s	1544
Folishing machines specially designed for the manufacture of gas turbine blades	1080
Folymerization units for the processing of lubricants, aviation fuels and components, mineral oil and petrochemicals, and parts therefor	4151
Folymers liquid (not water dispersions) alkyl polysulphide, (a synthetic rubber)	1801
Polytetrafluoroethylene (Teflon) and polytrifluorochloroethylene (Kel-F), pipe or tubing made of or lined with this material	1142
Polytetrafluoroethylene (Teflon) and polytrifluororochloroethylene (Kel-F) valves, cocks, or pressure regulators, and parts therefor	1133
Position, range, and height finders, and spotting instruments specially designed for military purposes, and specially designed components, parts, and accessories	M L- 5
Positive ion sources suitable for use in mass spectrographs and mass spectrometers, and capable of nandling uranium hexafluoride	AE-24
Potassium nitrate powder and black powders	ML-8
Potentiometers, both linear (including linear induction) and non- linear types - See list for specifications	1568
Pouring rods, moulds and crucibles composed of 97% or more by weight or beryllium oxide, magnesium oxide or zirconium oxide, or composed or zirconium oxide stablilized with lime and/or magnesium oxide	AE-13

Approved For Release 2001/08<u>/28) : ርሀል-</u> <u>ዋርም 78-02646</u> ይ<u>ሰ</u>000 100020001-4

- 35 -

Powders for military explosive and propellant uses, including black powder and potassium nitrate powder	M L- 8
Power pumping units (mud and sludge) for oil welldrilling and exploration	4150
Precipitation hardening alloy steels containing 4% or more nickel - See interpretative note #4 for specifications	1035
Presses, dehydration, used in the manufacture of military explosives	1118
Presses, extrusion, used for the extrusion of small arms, cannon, and rocket propellants	1118
Presses, mechanical or hydraulic, with total rated pressures of over 5,000 tons	1072
Presses, mechanical and hydraulic, n.e.s., with rated pressures of over 1,000 tons up to, and including, 5,000 tons	4072
Pressure refuellers, pressure refuelling equipment, associated equipment and components designed specially for military aircraft	ML-10
Pressure regulators, valves and cocks, n.e.s., designed to operate at temperatures below -130°C or incorporating 90% or more tantalum, titanium, or zirconium, either separately & combined; 50% or more cobalt, or molyboenum either separately or combined; polytetrafluoroethylene; polytrifluorochloroethylene	1133
Pressurized breathing equipment, partial pressure suits, anti- "G" suits, associated equipment and components suitable for use in military aircraft	ML-lo
Primer anvils, brass and bronze fabrications for	ML-16
Primer caps, fabrications for	M L-1 6
Profiling and duplicating machines, n.e.s. (planing, snaping, milling or grinding), including die-sinking machines	4090
Projectors (military) for smoke, gas and pyrotechnic projectiles and all specifically designed components and parts	M L- 2
Propane de-asphalting units	4151
Propellant fuels (military), chemical base, high energy, solid or liquid types	ML-8
Propellants, liquid or solid, for use with arms and ammunition	ML-8

Approved For Release <u>8001f08/28</u>: <u>CIA-RPP78</u>102646R000100020001-4

- 36 -

Pulse modulated altimeters (airborne)	1501
Fulse modulators capable of providing electric impulses of peak power exceeding 150 KW or of a duration less than 1/10 microsecond and pulse-transformers, pulse-forming equipment, and delay lines being specialized parts of such modulators	1514
Fumping (power) units (mud and sludge) and bottom hole pumps for oil well drilling and exploration	41 50
Pumps (except vacuum pumps) designed for delivering liquids separately or in combination with solids and/or gases, or designed to move molten metals by electromagnetic forces, or designed for operation below -130°C, or having all flow contact surfaces made of any of the materials specified under this entry	1131
Fumps (except vacuum pumps), delivering liquids separately or in combination with solids and/or gases; pipe valves and cocks, n.e.s., with all flow contact surfaces having 10% or more silicon (as metal alloy); and pumps designed to produce pressures of 450 p.s.i. or more, and having an inlet connection greater than 3 inches, internal pipe size	4131
Pumps, vacuum, all types, n.e.s.	4132
Pyrotecnnic projectors (military), and specifically designed components and parts	M L- 2
Quartz crystals (worked or unworked) and plates, radio grade only	1587
Radar, for military uses, and specialized components and parts	ML-11
Radar equipment, all airborne types, and specified ground and marine types - See list for specifications	1501
Madar equipment, n.e.s See list for specifications	4501
Eadar, memory transformers for	1555
Radioactive substances, equipment for the extraction of, centrifugal counter current solvent extractors only	1106
<u>Kadioactive</u> warfare materials, and equipment designed and intended for dissemination of and defense against radioactive warfare materials	ML-7
Madio communications confirment in a sile See list for specifications	ルギのユ

Radio receivers, panoramic (receivers which automatically search a part of the frequency spectrum and indicate the signals received), and specialized parts therefor	1516
Radio relay communication equipment and specialized components and sub-assemblies therefor other than short range and low power links for transmissions between the camera or studio and the television transmitter	1520
Radio spectrum analyzers designed to operate at frequencies in excess of 300 megacyles per second, and specialized parts therefor	1533
Radio testing equipment, n.e.s.	452 9
Radio transmitters and components, n.e.s., except radio link and relay equipment - See list for specifications	1517
Hadioactive material adapted for use in war to produce casualties in men, animals, or crops; and equipment for the dissemination of such material, and specialized components and parts therefor	ML-7
Radiusing machines specially designed for the making or measuring of gas turbine blades	1080
Kailway signalling apparatus	4481
Range, position, and height finders and spotting instruments specially designed for military purposes, and components, parts and accessories therefor	M L- 5
Reactors, nuclear	AE-36
Kecorders and/or reproducers, magnetic (other than those designed for voice or music), and specialized recording media, parts and components therefor	1572
Rectifying, fractionating and dephlegmating columns for the processing of lubricants, aviation fuels or components, natural or refinery gases, petrochemicals and mineral oils	4151
Refinery gas, equipment (including plants containing such equipment) for the extraction, production, refining or treatment of - See list for specifications	4151
Refractory materials composed of at least 97 percent by weight of beryllium oxide, magnesium oxide, zirconium oxide or zirconium oxide stabilized with lime and/or magnesium oxide; and crucibles, moulds and pouring rods composed of these materials	AE-13

Approved For Release-2001108/28-ECIA-RDP 18:02646R000100020001-4

- 38 **-**

Refueling equipment designed for use with military aircraft	M L-1 0
Regulators (pressure), valves and cocks, n.e.s., specially designed to operate at temperature below -130°C, or incorporating materials and parts as specified under "pressure regulators"	1133
Regulators, continuous automatic types - See "electronic automatic controlling units" for complete definition	4568
Remote control, guidance and tracking, equipment suitable for use with aircraft (piloted or pilotless) and weapons (guided or unguided)	1518
Repair shops, mobile, military types, and specially designed components and parts	M L- 6
Repeater (terminal & intermediate) equipment designed to deliver, carry or receive frequencies higher than 16 kc/s into or in a line communication system	1523
Reproducers and/or recorders, magnetic (other than voice or music) and specialized recording media, parts and components, therefor	1572
Rifles (small arms), and components and parts	ML-1
Rifles (recoiless), and components and parts	ML-2
Resolvers for use in electronic control equipment - See list for specifications	1568
Revolvers (small arms), and components and parts	M L- 1
Rock arill bits, rotary, i.e. having cones or sections which rotate freely and independently of the rotation of the body of the bit	1150
Rockets and apparatus, n.e.s., designed for the handling, control, activation, launching, and discharging of rockets and specifically designed components and parts therefor	ML-4
Rocket launchers and specifically designed components and parts	ML-2
Roller bearings, anti-friction, and parts, n.e.s See list for specifications	4601
Rolling machines (blade) specially designed for the manufacture	1080

Rolling mills, metal, and specially designed components, parts, accessories, equipment, motors and controls - See list for specifications	1305
Rolling mills, n.e.s.	4305
Root milling and/or grinding machines, and automatic measurement equipment, designed for the making or measuring of gas turbine blades	1080
Rotary rock drill bits, i.e. having conesor sections which rotate freely and independently of the rotation of the body of the bit	1150
Rotor grinders specially designed for the manufacture of jet engines	1080
Rubber, synthetic and intermediates therefor, as follows: (a) alkyl polysulphide liquid (not water dispersions) polymers; (b) fluorinated silicone rubber and other fluorinated elastomeric material and such organic intermediates for their production as contain 10% or more of combined fluorine	1801
Scrambling equipment, other than band scrambling and frequency inversion devices, and similar equipment for use in providing secrecy facilities in communications circuits - See list for specifications	1527
Scribing equipment for use in the manufacture of gas turbine blade aerofoil	1080
Searchlights, power controlled, and control units therefor, designed for military purposes	ML-17
Self-propelled guns, and all specifically designed components and parts	ML-6
Separation equipment, specifically designed for the separation of isotopes of uranium and/or lithium	AE-18
Servo motors (for control equipment), gear-head or plain, designed to operate at more than 300 cycles per second, and/or having a torque-to-inertia radio of 3,500 radians per second per second or greater	1568
Snaping machines designed for making gas turbine blade aerofoil	1080
Shaping machines (profiling and duplicating), n.e.s.	4090
Sheet, aircraft, working or forming machinery	1081
Shell rotating bands, fabrications for	M L-1 6

Approved For Release-2084/08/28 + GIA-RDP78-02646R000100020001-4

- 40 -

Shells, machinery, equipment and test gear for the manufacture of - See interpretative note for coverage	ML-18
Ships, new, with decks and platforms especially designed and strengthened to receive weapons	1416
Ships' course indicators (pressure proof) for submarines	1485
Ships - See vessels for additional listings	
Ships (surface or underwater) designed for military offensive or defensive action	M L- 9
Signalling apparatus for railway use	4481
Silencers, fire arms (mufflers)	ML-17
Silicon of a purity of 99.9% or more	1757
Silicon purifying and processing equipment	1360
Silicon steels (magnetic) with a core loss of 1 watt per kg. or less at B = 13,000 gausses and 50 cycles per second or less - See list for other embargo characteristics	1031
Silicone fluids and greases, as follows: (a) halogenated silicone fluids; (b) lubricating greases capable of operating at temperatures of 180°C or higher and having a drop point to 220°C or higher	1755
Silicone rubber, fluorinated, and other fluorinated elastomeric material and such organic intermediates for their production as contain 10% or more of combined fluorine	1801
Sighting television units for use in military aircraft fire control systems and components, accessories, attachments and parts - See interpretative note for further information	M L- 5
Small arms (rifles, carbines, revolvers, pistols, machine pistols) and specially designed components and parts	ML-1
Small arms, machinery, equipment and test gear for the manufacture of - See interpretative note for coverage	M L- 18
Smoke projectors, military, and specifically designed components and parts	ML-2
Smoke canisters, military, and specially designed components and parts	M L -14
Sodium azide, (detonating or priming composition)	1 701

Solvent extractors, centrifugal counter-current types, designed for extraction of radioactive substances	1106
Solvent processing units, including phenol, duosol, furfural and nitrobenzene solvent extraction and propane de-asphalting units	4151
Sonar devices and components and parts therefor	M1-11
Source materials (positive ion) suitable for use in mass spectrographs and mass spectrometers and capable of handling uranium hexafluoride	AE-24
Spacistors (semi-conductor amplifying devices related to transistors)	1545
Spar (airplane) millers	1051
Spectrographs, (mass) and spectrometers (mass), electromagnetic (ion separators) with analyzer assemblies capable of handling uranium mexafluoride	AE-22
Spindle assemblies, designed or rated for operation at speeds in excess of 80,000 r.p.m.	1016
Spinning latnes, (except those with a spindle drive motor of 25 n.p. or less)	1075
Spotting instruments, range, position and neight finders, specially designed for military purposes and specially designed components, parts and accessories	ML-5
Stabilizers for explosives - See list for items specified	1703
Stabilizers (thermal) used as a blending agent for aircraft fuels	1789
Steam boilers, marine, designed to operate at temperatures of 1100°F (593°C) and above	1441
Steel alloys containing 50% or more iron and containing molybdenum (10% or more); molybdenum-chrome alloy, (5% or more molybdenum with 14% or more chrome); cobalt (6% or more) except permanent magnetic materials containing less than 25% cobalt; columbium or tantalum (1.5% or more); nickel bearing steels (32% or more of alloying elements); and precipitation hardening alloy steels containing 4% or more nickel	1035
Steel and alloy castings for guns and arms	M L-1 6
Steel, electrical (magnetic) and alloys - See list for specifications of physical characteristics required for coverage by embargo	1631

Approved For Release 4001/98/28: CIA-RDP78-02646R000100020001-4

- 42 --

Steel, rough, forgings	ML- 16
Submarine equipment as follows: pressure proof snips course indicators, and specially constructed transmitting magnetic compasses	1485
Submarines, submarine batteries, and submarine nets	M L- 9
Sweetie barrels (tumblers) o feet and over (diameter), and with a capacity of over 500 pounds, used in the production of military explosives	1118
Synchros for control equipment (control and torque types), receivers, and transmitters, and special instruments having the same characteristics as embargoed synchros - See list for complete description	156 8
Synchro-tels (electronic control instruments rated to have the same characteristics as embargoed synchros)	1568
Synthetic film for dielectric use (condenser tissue) of 0.0015 in. (0.038mm) or less in thickness capable of use in condensors covered by IL 1500	1920
Synthetic lubricating oils and greases (ester type) - See "esters of" for complete description	1781
Synthetic rubber as follows: (a) alkyl polysulphide liquid polymers; (b) fluorinated silicone rubber and other fluorinated elastomeric material and such organic intermediates for their production as contain 10% or more of combinedfluorine	1801
Tank destroyers and specifically designed components and parts therefor	ML-2
Tankers designed for speeds of more than 18 knots when in full load condition	1410
Tankers designed for speeds of 18 knots or less when in full load condition	4410
Tanks and vehicles specially designed for military purposes - See list for specific coverage	ML-6
Tantalum and/or niobum steel alloys, containing 50% or more iron and 1.5% or more tantalum and/or niobium	1035
Tantalum compounds	1760

Tantalum electrolytic capacitors, n.e.s.	1562
Tantalum, raw materials, metals, seamless pipe and tubing, alloys (See list for specifications) and scrap forms covered by this item	1670
Tantalum, titanium, or zirconium valves, cocks and pressure regulators, and parts for same, of 98% purity or greater, separately or combined	1133
Tear gas (except chloropicrine) and equipment for the dissemination thereof	ML-17
Technetrons (semi-conductor amplifying devices related to transistors)	1545
Teflon (polytetrafluoroethylene), pipe and tubing made of or lined with	1142
Teflon (polytetrafluoroethylene) valves, cocks or pressure regulators	1133
Telecommunications cable (multipair), machinery for the manufacture of - See list for specifications	1353
Telecontrol and telemetering equipment suitable for use with aircraft and weapons (guided or unguided)	1518
Telegraph equipment, mechanical, electromechanical or electronic, used to translate written or printed text into electrical waveforms suitable for transmission over communication circuits, and receivers designed for accepting and displaying such waveforms and specialized components and accessories - See list for specifications	1519 3,
Telegraph terminal transmitting or receiving equipment, multi-channel	1523
Telemetering and telecontrol equipment suitable for use with aircraft and weapons (guided or unguided)	1518
Television sighting units specially designed for military fire control and range finding purposes, and components and parts	ML-5
Temperature resistant electronic components - See list for specifications	1560
Test gear specially designed for the manufacture of embargoed electronic valves, transistors and crystal diodes; and automatic or semi-automatic assembling of all valves, transistors and crystal diodes	1355 al

Approved For Release02001/0ይ/28ይ ፍለዶ RDR78-02646R000100020001-4

- 44 -

Testing apparatus or equipment (centrifugal) driven by a motor or motors of 400 hp or more; or capable of carrying a payload of 250 lb. or more; or capable of exerting a centrifugal acceleration of 8 or more "g" on a payload of 200 lb. or more	1576 on
Testing equipment for radio, n.e.s.	4529
Tetra-ethyl-lead (TEL) fluid	4788
Tetrafluoroethylene, polymerized or not, and manufactures wholly thereof	AE- 6
Tetranitronaphthalene (military high explosive)	M L- 8
Tetryl (military high explosive)	ML-8
Thermal stabilizers used as blending agents for aircraft fuels	1789
Thorium, irradiated, containing uranium 233	AE-1
Thorium minerals, and/or ores, raw and treated, (including residues and tailings) which contain either thorium or uranium or any combination thereof, exceeding 0.05% by weight	AE-1
Thorium (wrought or unwrought), alloys and compounds, excluding alloys containing less than 1.5% thorium, and medicinals	AE-1
Thyratron and modulator gas-discharge tubes rated for continuous operation with peak current and peak voltage exceeding 100 amperes and 9,000 volts at a pulse repetition frequency of 200 or more pulses per second; and hydrogen thyratrons of any rating	1559
Time interval measuring equipment - See list for specifications	1593
Tire casings, pneumatic, of a kind specially constructed to be bullet proof or to run when deflated	ML-o
Titanium metal, sponge and alloys (containing 70% or more titanium) and scrap forms covered by this item	1671
Titanium and/or zirconium production plants, including electric furnaces for the recovery of scrap (except plants for the production of titanium tetrachloride or zirconium tetrachloride), and specialized components thereof	1125
Titanium, tantalum or zirconium valves, cocks and pressure regulators	1133

TNT (trinitrotoluene), military high explosive	ML-8
Torpedoes (guided or unguided), apparatus and devices for the handling, control, activation, discharging or detection of, and all specifically designed components and parts	ML-4
Torpedo and submarine nets	M L- 9
Torque type synchros; transmitters and differential transmitters rated to have an electrical error of 18 minutes or less when tested by the proportional voltage method, and receivers and differential receivers rated to have an accuracy of 1.5 degrees or less when tested by the dynamic method, and special instruments rated to have the same characteristics	1508
Toxicological agents, including biological, chemical and radio- active materials adapted for use in war to produce casualties in men or animals, or to damage crops, and equipment specially designed for the dissemination of and defense against these materials	ML-7
Tractors, n.e.s., built to military specifications which differ materially from their normal commercial specifications	1450
Tractors specially designed for towing artillery and specially designed components and parts	ML-6
Tracking, remote control and guidance systems, n.e.s., suitable for use with aircraft (piloted and pilotless) and weapons (guided or unguided)	1518
Tracking devices for missiles and specifically designed components and parts	ML-5
Trailers specifically designed to carry ammunition and all specifically designed components and parts	ML-6
Training equipment, specialized military types, and specifically designed components, parts, attachments, and accessories - See interpretative notes for coverage	ML-1)
Frains, armoured railway types, and specifically designed components and parts	ML-6
Transformers, electronic pulse, designed specially as parts for pulse modulators	1514
Transistors and related devices other than germanium (or related semi- conductor amplifying devices such as fieldistors, spacistors and technetrons) and specialized parts therefor - See list for specifications on coverage of germanium transistors, also under this entry	1545

Approved For Relegs<u>e 和中1/98行象: 京中-</u>界<u>DP</u>78-02646R000100020001-4

- 46 -

Transistors, n.e.s.	4545
Transistor (embargoed types only) manufacturing machinery, equipment and test gear (including components or sub-assemblies), and automatic and semi-automatic assembling machinery, equipment and test gear for all transistors	1355
Transmitters or transmitter amplifiers, radic, and components and sub-assemblies - See list for specifications	1517
Travelling wave tubes	1558
Trifluoriae, chlorine	AE-1
Trichlorotrifluoroethane, (a fluorinated hydrocarbon)	AE-1
Trifluorochloroethylene, polymerized or not, and manufactures wholly thereof	AE-7
Trinitroanisol, Trinitronaphthalene, trinitrophenylusthyl-nitramine (tetryl), TNT, and trinitroxylene (military high explosives)	M L- 8
Trinitrophenol (picric acid)	1748
Trucks, lift type, built to military specifications differing materially from their normal commercial specifications	1450
Trucks, military, amphibious types	MŤ-o
Tube making machinery, equipment and test gear (including components or sub-assemblies) specially designed for the manufacture and/or assembly of embargoed electronic valves, transistors and crystal diodes	1355
Tubes, electronic, and specialized parts - See list for description or specialized tubes covered	1558
Tubes, electronic, (embargoed type only) manufacturing and/or assembling machinery (automatic or semi-automatic), equipment and test gear, including components and sub-assemblies	1355
Tubes, image converters, and electronic storage types - See list for specifications	1555
Tubes, photomulipliers - See list for specifications	1549
Tubes, ruggedized vidicon types - See list for exceptions	1555
Tubes, thyratron and modulator gas-discharge tubes - See	1559

Approved For Release 2001/08/28 OCIAER DE 1000646 E 10000 1000 2000 1-4

- 47 -

Tubes, traveling wave types	1558
Tubes, X-ray, flash discharge type	1553
Tubing and pipe made of or lined with polytetrafluoroethylene (Teflon) or polytrifluorochloroethylene (Kel-F)	1142
Tubing and pipe (seamless) made of tantalum - See list for exceptions permitted for surgical grade tantalum	1670
Tubing, molybdenum, or platinum clad molybdenum tubing	1658
Tumblers (sweetie barrels), o feet and over in diameter and over 500 pounds product capacity capable of use for the production of military explosives	1118
Tungsten wire, and cut coils, coated (all types), and specified uncoated types - See list for specifications	1668
Turbine blades, gas, machines and equipment for the manufacture and/or measurement of - See list for examples	1080
Turbine disc turning machines specially designed for the manufacture of jet engines	1086
Turning machines, for compressor and turbine discs, specially designed for the manufacture of jet engines	1086
Turrets for vessels of war	ML-9
Ultrasonic wave equipment for communications or detection	1502
Underwater detection devices, (magnetic pressure and acoustic), specially designed for military purposes, and controls, components, parts, accessories and attachments thereof	M L- 9
Underwater location apparatus, n.e.s., for detecting or locating objects under water by magnetic or acoustic or ultrasonic methods and specialized components of such apparatus	1510
Underwater sound equipment (military), and components and parts	ML-1.
Unsymmetrical dimethyl hydrazine	1731
Uranium enriched in isotope 235 and compounds and alloys artificially enriched in isotope 235; uranium 233, and alloys and compounds containing uranium 233	AE-1
Uranium, wrought or unwrought, including alloys and compounds of natural uranium, having a uranium contente xceeding 0.05%, except medicinals - 47 -	AE-1

Approved For Release 200 10 8120 - 21A-RDP 78-02646R000100020001-4

- 48 -

Uranium, irradiated, containing plutonium	AE-1
Uranium minerals, raw and treated, (including residues and tailings) which contain by weight at least 0.05% of uranium or 0.05% uranium and thorium combined	AE-1
Uranium isotopes, equipment especially designed for the separation of	AE-18
Vacuum furnaces, induction type, designed to operate at pressures lower than 0.1 mm. of mercury, and at temperatures higher than 1100°C	1328
Vacuum pumps, all types, n.e.s.	4132
Valves, with bellows seal, wholly made of or lined with aluminum, nickel, or alloy containing 60% or more nickel, either manually or automatically operated	AE-27
Valves, cocks, pressure regulators, n.e.s., specially designed to operate at temperatures below -130°C or incorporating materials and parts as specified under "pressure regulators"	1133
Valves (electronic) making machinery; equipment and test gear for the manufacture or assembly of electronic valves, transistors and crystal giodes - See list for specifications	1355
<u>Valves</u> - See various entries under tubes	
Vehicles, armed or armored for military purposes	ML-6
Vehicles, automotive, n.e.s., built to military specifications differing significantly from their normal commercial specifications	1450
Vehicles, military, amphibious, and deep water fording types, and specially designed components and parts	ML - 6
Vehicles, military type, recovery	ML-6
Vehicles, military types, and components and parts therefor - See list for types covered	ML-6
<u>Vessels</u> - See ships	
Vessels designed for offensive or defensive action, combat types (surface or underwater)	M L- 9

Vessels, as follows: (a) fishing vessels and nulls designed for	1416
speeds of 17 knots or over when in full load condition; (b) sea-going vessels, including coasters, and hulls therefor, n.e.s, designed for speeds of 20 knots or over when in full load condition; (c) vessels with hulls and propulsion machinery made wholly or primarily of non-magnetic materials; (d) vessels incorporating any Munition List items or other embargoed items, or arrangements for the demagnetization of the vessel	
Vessels of war (surface or underwater), and accessories, attachments, components and parts for these vessels, such as turrets, naval gun mounts, submarine batteries and catapults	M L- 9
Vidicon-type tubes, ruggedized	1555
warships, whether or not converted to non-military use, and regardless of current state of repair or operating condition	1415
Waveguides, electromagnetic, and components therefor - See list for specifications	1537
Well logging instruments and equipment for oil well arilling	4150
Whaling factories	4411
Wire, molybdenum - See list for exceptions	1658
Wire, nickel, composed of wire containing 95% or more nickel,	AE-9
Wire mesh, woven, composed of wire containing 95% or more nickel and containing 60 or more wires per linear centimeter	AE-10
wire, tungsten, all coated types and specified uncoated types - See list for specifications	1668
X-ray tubes, flash-discharge type	1553
dirconium, tantalum or titanium valves, cocks and pressure regulators, and parts therefor, of 90 percent purity separately or in combination	1133
Zirconium metal, alloys containing more than 50% zirconium by weight, and compounds, in which the ratio of hafnium content to zirconium content is less than one part to 500 parts by weight and manufactures wholly thereof	AE-8
Zirconium oxide, or zirconium oxide stabilized with lime and/or magnesium oxide (97% or more by weight) for use in refractories, and crucibles, moulds and pouring rods composed of these materials	AE-13

Approved For Rele<u>ase 2004/198/38ը: GIA-RDR78</u>-02646R000100020001-4

- 50 -

Zirconium and/or titanium production installations, including
electric furnaces for the recovery of scrap, and specialized
components thereof (except plants for the production of
zirconium tetrachloride or titanium tetrachloride)

1125

Approved For Release 2001/08/28 : CIA-RDP78-02646R000100020001-4 CONFIDENTIAL
